HIWIN RAS rotary and swivel tables

4. HIWIN RAS rotary and swivel tables

4.1 Properties of RAS rotary and swivel tables

RAS rotary and swivel tables are directly driven, maintenance-free precision axes. They use water-cooled torque motors from the TMRW series, guaranteeing high levels of acceleration and torque. Equipped with various high-resolution encoders, the rotary and swivel tables achieve accuracies of just a few arc seconds and can be integrated into all standard control concepts. Featuring crossed roller and axial/radial bearings, the tilt-resistant mechanical design is able to accommodate maximum loads.

Key features:

- Plug-and-play rotary and swivel table ready for installation
- Maintenance-free direct drives in all axes
- High acceleration, torque and accuracy
- Tilt-resistant mechanical design with large diameter
- Swivel axis with precision crossed roller bearings
- Rotary axis with extremely rigid axial/radial bearing
- Integrated clamp

Typical applications:

- 5-axis milling machines
- Laser processing machines
